

MODERN AND SECURE WEB-BASED SOFTWARE  
FOR CUSTOMER AND PATIENT COMMUNICATION IN THE HEALTHCARE INDUSTRY

## Strong Authentication

At the time of registration, electronic identity verification by the user or provider ensures that confidential information is disclosed only to authorised parties.

## Secure Communication

A secure message function can be used as a convenient way to communicate with the customer. Messages can also contain images, videos, attachments and forms.

## Versatile Forms

Ready-made or custom forms provide an efficient way to collect information. Included are templates and a form editor to create your own. A built-in formula function adds more capabilities to information-gathering and output possibilities.

## Integrations

With the API, Navisec Health can be integrated with existing solutions and technologies. Contact us for more details.
