

BUILDING FUTURE RELATIONS IN HEALTH

Kuopio, the biggest city in Eastern Finland is internationally renowned for know-how and research in health technology, clinical healthcare and the pharma industry.

The developing Kuopio Health open innovation ecosystem is a unique public-private cooperation model for universities, institutes and companies. Kuopio Health is constantly seeking new partners for research, development, innovation and commercialisation activities.

Companies and other key players from the Kuopio region want to build long-lasting relationships and collaboration networks with the UK in the health sector.

HEALTH AND WELLBEING – The world's best ecosystem for health R&D.

DIGITAL HEALTH Finland is the second most advanced digital economy in the EU and this also extends to healthcare.

PHOTONICS The science and technology of light is a rapidly growing industry in Finland with 20% annual growth.

ADAMANT HEALTH

Analysis service for Parkinson's disease treatment: Wearable monitoring of electrical muscle activity and motion at home. 3rd party hardware. • Analysis software based on algorithms. Patent pending, user interface ready in 2019. • Reporting of patient's condition during 1-2 days home monitoring.

AFEKTA TECHNOLOGIES

Metabolic profiling services for R&D in industry and academia. Science-based, curiosity-driven metabolic profiling with mass spectrometry technology for food and nutrition research. Our technology gives knowledge and understanding to develop better products and help people make better and informed decisions to improve their lifestyle and health.

ERGOREST

Ergorest is a pioneer and innovator of forearm supports designed for use in computer, office and industrial applications. Over 30 years of scientific research and product development anchored in knowledge of the human body have ensured that Ergorest is known worldwide for its high-quality products. Ergorest is an effective tool in the prevention of a range of complaints and illnesses resulting from computer, office and industrial work. Exports to over 20 countries.

NAVISEC HEALTH

Modern and secure web-based software for customer and patient communication in the healthcare industry. Strong authentication. Versatile forms: standard templates or customised forms provide an efficient way to collect information. With API, Navisec Health can be integrated with existing solutions and technologies.

NEUROCENTER FINLAND

National network bringing together clinical and preclinical researchers, entrepreneurs, health companies and funding agencies: One-stop shop for advancing personalised care for brain diseases • Promoting research into innovations in clinical testing and practices • Creating ecosystems for innovation and collaborative projects.

OPLATEK GROUP

Oplatek is the leading Nordic solutions provider in photonics – providing contract manufacturing of speciality optical fibres, thin-film coatings, moulded glass components and assemblies. Oplatek is seeking business in the UK with manufacturers of healthcare devices and analysers using photonics.

SALLI SYSTEMS

The inventor of saddle chairs in the 1980s, Salli has manufactured them ever since. Sitting health concept; ergonomic seats and sitting ergonomics training • Exporting to over 60 countries for 25 years • Chairs are handmade in Finland, 10-year warranty • Looking for active dealers especially in the medical and office field.

VIREUM

The Vireum service platform enables fast and easy connections to customers. The Vireum platform provides more efficient healthcare services for a larger number of customers. Vireum's versatile services, such as mobile applications, video calling and remote reception for healthcare and home care, are immediately available to you and your clients when you sign up.
